FOR IMMEDIATE RELEASE

**Adfinitas Health Selects Continuum as their Revenue Cycle Management Partner
Continuum will support the growth of Mid-Atlantic's largest private hospitalist group**

Marlton, NJ – September 12, 2017 – Adfinitas Health, the largest private hospitalist group in the Mid-Atlantic region, has selected Continuum Health, a value-based care strategy and management company, as their revenue cycle management partner in advance of a planned expansion outside of their core region. Adfinitas currently serves over 50 healthcare sites of service – both hospitals and post-acute care centers around the Mid-Atlantic region – delivering high-quality, cost-effective integrated medical and advisory services. The company recently celebrated its 10-year anniversary in January, marking a decade of strong growth and unwavering commitment to optimizing value for patients and clients.

“Continuum’s expertise, proven track record, and ability to support customer success in a complex healthcare environment made them our clear choice as we sought a new partner,” said Eric Nass, President of Adfinitas Health. “Our firm is poised for significant growth outside of our current footprint and we needed a strong revenue cycle management partner to support our expansion goal. Hospitalists are one of the largest medical specialties and we are excited to help advance this field, with a clear focus on delivering better quality, clinical outcomes, and patient satisfaction.”

“Adfinitas Health represents the very best of healthcare,” said Peter Bailey, CEO of Continuum Health. “They have built an excellent reputation and a proven track record of being a true partner to their clients. We’re very pleased by the opportunity to support the Adfinitas team as they expand their organization and venture further into value-based care opportunities.”

About Continuum Health

As a management services organization (MSO), Continuum Health delivers proven solutions to provider groups and aggregators, helping foster self-sufficiency by maximizing fee-for-service payments, transitioning them to value-based programs and preparing them for risk. Continuum also collaborates with payers to help drive value-based adoption among providers and improve the health outcomes of patients. The company optimizes performance through revenue cycle management, value-based care, practice management services and specialty care solutions. More than 1,500 primary care physicians, specialists and nurse practitioners caring for more than 1 million patients depend on Continuum’s business and clinical experts to help achieve their goals.
